Growing on Quality—Since 1908

Over a quarter century ago the call came, NOT for MORE seed, but for BETTER seed. Planters even then were sustaining heavy losses through the use of seed grown under ordinary conditions. They were paying dearly for quality and purity without getting it. It was with the realization of this need that I. N. GLICK (the Founder of the GLICK'S SEED FARMS) started growing tomato seed on an isolated quality basis for planters who insisted on having the best that could be grown; today his four sons and a son-in-law are working with him in growing "seed that **IS BETTER**,—because **IT'S GROWN DIFFERENT!**" We live right on our respective farms and personally grow this seed on a rigid quality and purity basis. We make no claim of being either the oldest or the largest seed growers in existence, but we have learned through these years that "Our Folks" do appreciate the extra protection they get UNDER OUR SEAL, that is not available elsewhere.

Glick's Seed is Certified!

A number of "Our Folks" from the South and elsewhere visit us each year and inspect our plantings. In addition to this, Mr. K. W. Lauer, Advanced Plant Pathologist of the Pennsylvania Department of Agriculture, (as well as several Agricultural experts of Pennsylvania State College) inspected, approved and certified our crops for purity of type and freedom from disease. OUR PLANTINGS ARE ALWAYS OPEN FOR INSPECTION.

The GLICK'S SEED FARMS are 5 miles East of Lancaster, 58 miles West of Philadelphia, along Route 340, (1 mile North of U. S. Route 30), **entirely isolated from any commercial tomato growing section.** Come and see just what we are doing. Visitors always welcome—except Sundays.

GLICK'S SEED FARMS

**High
Germination
Guaranteed!**

Each Variety Grown
and Kept on
Separate Farms

It's Certified!

IF YOU

have planted other tomato seed with resultant disappointment,—
didn't get the quality and purity YOU had a right to expect,—didn't
get the protection YOU were entitled to—TRY GLICK'S!

GLICK'S SEED

enjoy a prestige SECOND TO NONE among successful planters today.

YOU TOO

can be certain that YOUR plantings are based upon the solid rock of
proven worth—by planting GLICK'S SEED EXCLUSIVELY.

ONLY A LIMITED QUANTITY

can be produced each season under our rigid quality-first program.
Order your supply early.

GLICK'S IMPROVED MARGLOBE—1-lb., \$4.50; 10-lb., \$4 lb.; 25-lb., \$3.50 lb.
HILLBORN'S SELECTED GLOBE—1-lb., \$4; 10-lb., \$3.50 lb., 25-lb., \$3.00 lb.
GLICK'S PRITCHARD (Scarlet Topper)—1-lb., \$5; 10-lb., \$4.50 lb.; 25-lb., \$4.00 lb.
Above varieties: Oz., 40c.; 1/4-lb., \$1.50; 1/2-lb., \$2.50
GROTHEN'S NEW RED GLOBE—Oz., 60c.; 1/4-lb., \$2.00; 1/2-lb., \$3.50; Lb., \$6.50

"Glick's Seed is better, because—It's Grown Different."

Glick's Improved Marglobe

The MARGLOBE has been a Glick's Seed Farms' specialty ever since it was first introduced. The result of our precise selection work on this tomato from year to year on our farms is an **Improved Strain** — "**GLICK'S IMPROVED MARGLOBE**" justly acclaimed by successful planters today as being the most outstanding tomato ever developed. This strain is bred especially for critical planters who realize the value of quality and purity in tomato seed, and is noted for its extreme solidity, deep globe type and productiveness, as well as its disease resistance,—being exceptionally vigorous and healthy. Ripens a beautiful scarlet red well up to the stem.

Glick's Pritchard (Scarlet Topper)

A cross between the Marglobe and Cooper's Special Self Topper, combining the good qualities of both parents. Vines are medium dense, self-topping; and, if fed liberally, will produce an enormous crop of good-sized, globe-shaped smooth, solid fruits of a deep attractive red color, both exterior and interior. Glick's Strain is extremely popular among early shippers and canners. It is disease resistant, and 10-12 days earlier than the Marglobe.

Grothen's New Red Globe

Developed by Mr. Ed. Grothen,—a successful Lower-East Coast Florida Grower of over 30 years experience, and is well adapted to old tomato land. It has open-type vines, and is a heavy yielder of smooth, deep globe-shaped fruits (large in size until late in the season) producing high percentage of fancies. The color is similar to Marglobe, ripens 10-14 days earlier. An exceptionally solid tomato. The interior ripens up slowly, making a very satisfactory shipper. Popular among market gardeners where quality and earliness are important factors.

Hillborn's Selected Globe

An improved strain of the original pink Globe. Produces a heavy crop of large, globe-shaped fruits. This was the leading tomato in the South for many years until the Marglobe was developed.

Absolute Purity Prevails

Each variety is grown and kept on separate farms. An individual line of seed-extracting machinery and equipment is installed for each variety on that farm. The seed is then fermented, washed, dried and stored on the different farms FOR PURITY'S SAKE. THIS IS POSITIVELY THE ONLY SAFE WAY TO HANDLE MORE THAN ONE VARIETY. Even though it means additional expense for us here, the extra protection thus given "OUR FOLKS" makes it well worth it. The enthusiastic reports sent us from time to time on their success with GLICK'S SEED are very encouraging.

Can **YOU** afford to take chances on **YOUR** crops when other planters are playing safe with Glick's Seed? Only a limited quantity is available each season, which is SOLD UNDER SEAL FOR YOUR PROTECTION. Orders are returned when our own seed is all gone. YOU GET ONLY GLICK'S SEED UNDER THIS SEAL.

SOLD AND RECOMMENDED BY

WE GUARANTEE that YOU must be fully satisfied with the quality and purity of our seed (if purchased with seal unbroken) or your purchase price will be cheerfully refunded.

High Germination Guaranteed!
